ℹ️ **How to use this guide:** Open this file in any web browser (Chrome, Edge) and press `Ctrl` + `P` to print or save as PDF. Set paper size to **A4** and enable *Background graphics* in print settings for full colour output.

SECTION 1

Getting Started

1.1 Logging In

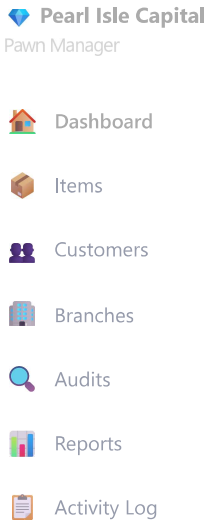
1. Open your browser and navigate to the application URL provided by your administrator.
2. Enter your **username** (or email) and **password** .
3. Click **Sign In** . You will be redirected to the Dashboard.

> ✅ If you forget your password, contact your system administrator to reset it.

1.2 Navigation Sidebar

The left sidebar is always visible and provides access to all main sections of the application.

- **Dashboard** — Overview and quick stats
- **Items** — Browse all pawned articles
- **Customers** — Customer directory
- **Branches** — Branch management
- **Audits** — Audit sessions
- **Reports** — Analytics & summaries
- **Activity Log** — System event history



1.3 User Roles

Role	Description	Key Permissions
USER	Standard staff member	View items, customers, audits, reports. Scan barcodes in standard audits.
ADMIN	Branch manager / supervisor	All of USER + create/edit items, manage customers, create & finalize audits, manage branches, bulk release items.
SUPER_ADMIN	System administrator	Full access to all features and settings.

⚠️ Actions that require ADMIN or SUPER_ADMIN are marked with a Admin Only badge throughout this guide.

SECTION 2

Items — Pawned Articles

2.1 Browsing & Searching Items

Navigate to **Items** in the sidebar. Items are grouped by **Ticket Number**. Click any ticket row to expand and see individual items.

Search & Filter

- Type in the search bar to find by **ticket no**, **barcode**, or **customer name**
- Use the **Status** filter to show only Active or Released items
- Results update as you type

Ticket Groups

- Each row shows the **Ticket No**, customer name, pawn date, item count, and total weight
- Click the ▶ chevron (or the row) to expand individual items
- Click customer name to go directly to their profile

> ✅ Use the **CSV Import** button to bulk-upload items from a spreadsheet. Download the template first to ensure correct column format.

2.2 Creating a New Item Admin Only

1. Click the **+ New Item** button (top-right of Items page).
2. Fill in the form fields (see table below).
3. Click **Save Item**. A barcode is automatically generated.

Field	Required	Description
Customer	✅ Yes	Search and select existing customer
Ticket No	✅ Yes	Pawn ticket number (e.g. TK-001)
Pawn Date	✅ Yes	Date the item was pawned
Item Type	✅ Yes	ring, chain, bracelet, earrings, necklace, bangle, pendant, other
Net Weight (g)	✅ Yes	Net weight of gold in grams (3 decimal places)
Gross Weight (g)	No	Total weight including stones/setting
Karatage (K)	No	Gold purity e.g. 22, 18, 14
Remarks	No	Free text notes about the item

2.3 Editing an Item Admin Only

Inline Edit (Items list page):

1. Expand a ticket group and then expand an individual item.
2. Click the ✏️ **Edit** button in the item row.
3. Modify the fields and click 💾 **Save** .
4. All changes are recorded in edit history.

Edit via Item Detail page:

1. Click **Full Detail** on any item.
2. Click **Edit Item** in the detail panel.
3. Modify fields and **Save** .

> 🔒 Editing is **disabled** on items that are part of a finalized audit.

🏷️ SECTION 2 (CONT.)

Item Detail & Barcode Printing

2.4 Item Detail Page

Click **Full Detail** on any item to open its dedicated page at `/items/:id`.

📋 Information Displayed

- **Barcode** — large scannable barcode image
- **Customer** — name, NIC, phone with link to profile
- **Item facts** — type, net weight, gross weight, karatage, remarks
- **Dates** — pawn date, registration date, release date (if released)
- **Status** — Active or Released

📜 Edit History

Scroll down to see a full timeline of every field change — who changed it, when, and the old vs new value.

🖨️ Printing the Barcode

1. Open the item's detail page.
2. Click the 🖨️ **Print** button near the barcode.
3. A print-optimized label appears with barcode, ticket no, customer name, weight, and karatage.
4. The printer auto-cuts after printing.

> ✅ The label is sized for a **58mm thermal receipt printer**. Make sure the correct printer driver is installed.

🔎 Scan History

Shows every time this barcode was scanned — creation, audit scans, and verification events — with timestamp and operator.

SECTION 3

Customers

3.1 Browsing Customers

Navigate to **Customers**. Customers are displayed as cards in a grid.

Search & Filter

- Search by **name** or **NIC number**
- Filter by **Branch** using the branch pills at the top
- Each pill shows the customer count for that branch

Customer Cards

Each card shows:

- Customer initials avatar
- Full name, NIC number
- Phone and email
- Assigned branches
- Number of pawned items

3.2 Creating a Customer Admin Only

1. Click **+ New Customer** (top-right).
2. Fill in **Full Name** (required), NIC, Phone, Email, and Address.
3. Optionally assign to one or more **Branches**.
4. Click **Save**.

> You can also bulk-import customers using the **CSV Import** button. Download the template to see required columns.

3.3 Customer Detail Profile

Click any customer card to open their profile page.

Statistics

Total items, active count, released count, and total active gold weight

Contact Info

NIC, phone, email, address, member since date

Pawned Items

Table of all items with type, weight, date, and status. Click any row to open item detail.

SECTION 4

Branches

4.1 Creating a Branch Admin Only

1. Navigate to **Branches** in the sidebar.
2. Click **+ New Branch** .
3. Enter the **Branch Name** (e.g. "Head Office", "Kandy Branch").
4. Click **Save** . The branch card appears immediately.

> Branches are used to filter customers and to scope Initial Audits to a specific location.

4.2 Assigning Customers to a Branch Admin Only

1. On the Branches page, click the **Manage Customers** button on a branch card.
2. A side drawer opens showing current members and all available customers.
3. Use the search box to find a customer, then click **+ Add** .
4. To remove, click the ✕ next to a customer's name.

> Customers can belong to **multiple branches**. The branch assignment is used for filtering the customer list and for creating branch-specific initial audits.

4.3 Deleting a Branch Admin Only

> Deleting a branch removes all customer-branch assignments for that branch. Customer records themselves are **not** deleted.

1. Click the **Delete** button on a branch card.
2. Confirm the action in the dialog.

SECTION 5

Standard Audit (Barcode Scan)

What is a Standard Audit?

A standard audit physically verifies all Active items by scanning their barcodes one by one. It reveals which items are present (Found), missing (Missing), or unknown (Unknown).

Start Audit → Scan Barcodes → Review Results → Finalize → Release Missing

5.1 Starting a Standard Audit Admin Only

1. Go to **Audits** and click **New Audit** (navy button, top-right).
2. Optionally enter notes about this audit session.
3. Click **Start Audit** . The audit detail page opens immediately.

> The system snapshots all currently active items at the moment the audit is created. Only those items appear as expected.

5.2 Scanning Items

The scanner input is automatically focused when you open the audit. Simply scan each barcode label with a barcode reader.

Scanner Input

- The cursor is always in the scan input box — no need to click
- After each scan the box clears automatically
- The scanned item moves to the top of the list with a status badge
- You can also type a barcode manually and press `Enter`

Live Stats Bar

The top of the page shows running counts:

- ✓ Found — scanned and matched
- ✗ Missing — expected but not yet scanned
- ? Unknown — scanned but not in audit list

5.3 Scan Statuses Explained

Status	Meaning	Action
✓ FOUND	Item was scanned and matched an expected item	No action required
✗ MISSING	Item was expected but its barcode was not scanned	Investigate. Can be released after finalization if confirmed missing.
? UNKNOWN	Barcode was scanned but it does not belong to this audit's snapshot	Verify the item. It may have been added after the audit started.

SECTION 5 (CONT.)

Corrections, Finalize & Bulk Release

5.4 Corrections & Remarks During Scanning

Click any scanned item row to expand its detail panel.

Adding Remarks

- Type in the **Remarks** text area
- Remarks save automatically when you click away (on-blur)
- Useful for noting physical condition of an item

Correcting Item Values

- Click **Edit** to correct **Item Type** or **Net Weight**
- All corrections are permanently recorded with timestamp and operator
- The correction history panel shows all past changes across all audits

> Corrections and remarks are **disabled** once an audit is finalized.

5.5 Finalizing the Audit Admin Only

> Finalization is **irreversible**. Once finalized, no edits can be made to the audit.

1. Click **Finalize Audit** (bottom of the page).
2. Confirm in the dialog. All unscanned active items are marked MISSING .
3. The audit status changes to Finalized .

5.6 Bulk Release of Missing Items Admin Only

After finalization, items confirmed as missing can be released (removed from active stock).

1. In the finalized audit, tick the checkboxes next to MISSING items.
2. Use **Select All Missing** to check all at once.
3. Click **Release Selected** .
4. A two-step confirmation modal shows: first review the list, then click **Confirm Release** .
5. Released items are marked Released and removed from future audit snapshots.

> Only items that are still Active can be released. Already released items are shown greyed-out and cannot be selected.

📋 SECTION 6

Initial Audit (Inventory Review)

What is an Initial Audit?

An initial audit is a **manual review** of your existing inventory — no barcode scanning required. It is used to verify and correct item details (weights, types, karatage) by physically inspecting each item. Items are grouped by ticket number so an operator can review one ticket at a time.

Create Audit (with filters) → Review & Edit Items → Mark Tickets Complete → Finalize → Download Report

6.1 Creating an Initial Audit Admin Only

1. Go to **Audits** and click **Initial Audit** (purple button, top-right).
2. In the drawer, set optional filters:

Filter	Description
Date From / Date To	Only include items with pawn dates in this range
Branch	Only include items belonging to customers in the selected branch
Notes	Internal notes for this audit session

3. Click **Start Initial Audit** . You are taken to the audit detail page.

> ✅ Leave filters blank to include all active items. Filtering by branch or date helps break a large inventory into manageable sessions.

SECTION 6 (CONT.)

Reviewing & Editing Items

6.2 Reviewing Ticket Groups

Items are displayed grouped by ticket number. Each group row shows: Ticket No, Customer Name, Pawn Date, item count, and total net weight.

Progress Bar

At the top of the page a **progress bar** tracks how many tickets have been marked complete. The bar turns **green** when 100% of tickets are reviewed — the Finalize button activates at this point.

1. Click any ticket row (or the ▶ chevron) to expand it and see individual items.
2. Review each item — verify the type, weights, and karatage match the physical item.

6.3 Editing Items Admin Only

1. Expand a ticket group and then expand an individual item.
2. Click **Edit** .
3. Correct any of the following fields:

Item Type	Net Weight	Gross Weight
e.g. ring → bracelet	in grams (3dp)	optional

Karatage	Remarks
e.g. 22, 18, 14	free text notes

4. Click **Save** . The change is recorded in the item's edit history.

> Every edited field is captured in the audit report. The report shows the **original system value** alongside the **audited corrected value** in separate columns.

SECTION 6 (CONT.)

Adding Items to a Ticket

6.4 Adding a New Item to an Existing Ticket Admin Only

Sometimes one physical article may need to be recorded as two separate items (e.g. a pair of earrings entered as a single record). Use **Add Item to Ticket** to add the extra item directly within the audit.

1. Expand the relevant ticket group.
2. In the expanded footer, click **+ Add Item to Ticket** (blue button).
3. An inline form appears. Fill in:

Field	Required	Notes
Item Type	✅ Yes	Select from pill buttons (ring, chain, bracelet, etc.)
Net Weight (g)	✅ Yes	Minimum 0.001g
Gross Weight (g)	No	Optional
Karatage (K)	No	1–24
Remarks	No	Free text

4. Click **Add Item to Ticket**. The new item appears in the ticket immediately.

> ✅ The new item inherits the ticket's customer and pawn date automatically. A new barcode is generated for it behind the scenes.

> 🌟 Items added during an audit are clearly marked in the report with a green **"Added in Audit"** column showing **YES**, and highlighted in green in the PDF export.

SECTION 6 (CONT.)

Marking Complete & Finalizing

6.5 Marking a Ticket as Complete

After physically reviewing all items in a ticket group, mark it as complete to track your progress.

1. Expand a ticket group.
2. At the bottom of the expanded footer, click **"Done — Mark Ticket Complete"** (green button).
3. The ticket row disappears from the *pending* list and moves to *completed*.
4. The progress bar at the top increments.

> You can also click the ✓ checkmark icon in the ticket row (7th column) to quickly mark a ticket without expanding it.

Progress States

60%

100% ✓

Purple bar while in progress. Turns **green** at 100% — Finalize button becomes active.

6.6 Finalizing the Initial Audit Admin Only

> ⚠️ Finalization is **irreversible**. All editing is locked permanently after finalization.

1. Ensure all tickets are marked complete (progress bar = 100%).
2. Click **Finalize Audit** (header, top-right). The button is only enabled when all tickets are done.
3. A confirmation modal appears showing a list of all completed ticket numbers.
4. Read the confirmation word shown in the modal (e.g. **"EAGLE"**).
5. Type the word exactly in the input box.
6. Click **Confirm Finalize** (or press `Enter`).

Finalize Initial Audit — Confirmation

✅ All **12 tickets** have been reviewed and marked complete.

TK-001 TK-002 TK-003 TK-004 TK-005 ...

⚠️ This action is irreversible. Type the word below to confirm.

Type **EAGLE** to confirm:

EAGLE

SECTION 6 (CONT.)

Downloading Audit Reports

6.7 Excel & PDF Reports

Both before and after finalization you can download a full report of the audit items. Two buttons appear in the audit header:

Download Excel

Green button — downloads an `.xlsx` file with two sheets:

- **Audit Info** — metadata (date, branch filter, totals, edited/added counts)
- **Audit Items** — full data table with all columns

Download PDF

Red button — downloads a landscape A4 `.pdf` with:

- Title, audit date, branch, date range, status in header
- Colour-coded legend explaining column colours
- Full data table with highlighting
- Page numbers in footer

Report Column Reference

Column	Always Present?	Description
Ticket No	✅ Yes	Pawn ticket number
Customer	✅ Yes	Customer full name
Item Type	✅ Yes	System value (before audit)
Audited Item Type	Only if any type was edited	Corrected value entered during audit
Net Wt (g)	✅ Yes	System net weight
Audited Net Wt (g)	Only if any weight was edited	Corrected weight
Gross Wt (g)	✅ Yes	System gross weight
Audited Gross Wt (g)	Only if any gross weight was edited	Corrected gross weight
Karatage	✅ Yes	System karatage value
Audited Karatage	Only if any karatage was edited	Corrected karatage
Remarks	✅ Yes	Remarks text
Audited Remarks	Only if any remarks were edited	Corrected remarks
Added in Audit	Only if items were added	"YES" for items added during this audit session

💡 **"Audited" columns only appear when needed.** If nothing was corrected during the audit, the report has clean simple columns without the extra "Audited" pairs.

🎨 In the **PDF report**: amber-highlighted cells show corrected values; green-highlighted rows mark items added during the audit.

📊 SECTION 7

Reports & Activity Log

7.1 Reports Page

Navigate to **Reports** for system-wide analytics. This page provides summary statistics and downloadable data exports.

📈 Summary Statistics

- Total active items and total weight in stock
- Total customers and branches
- Items released this month
- Audit completion rate

📥 CSV Downloads

- **Items CSV** — all item records with all fields
- **Customers CSV** — all customer records
- Use these for external reporting or backup

7.2 Activity Log

Navigate to **Activity Log** to see a chronological record of all significant actions performed in the system.

Events Tracked

- Item created / edited / released
- Customer created / updated
- Branch created / deleted
- Audit started / finalized
- Barcode scanned
- CSV import completed

ℹ️ Each log entry shows the **action type**, the **entity affected**, the **operator** who performed it, and a precise **timestamp**. Activity logs cannot be deleted.
